The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/845,066	Applicant(s) KEHR ET AL.	
	Examiner LENA NAJARIAN	Art Unit 3686	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Notice to Applicant

1. This communication is in response to the Request for Continued Examination (RCE) filed 5/15/09. Claims 1-37 and 39-97 are cancelled. Claim 38 has been amended. Claim 38 is pending.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/15/09 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 38 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. Claim 38 recites the limitation "said one or more medical monitoring devices" in line 11. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

7. Claim 38 is rejected under 35 U.S.C. 102(e) as being anticipated by Douglas et al. (6,039,688).

(A) Referring to claim 38, Douglas discloses a method for customizing medical protocols, comprising the steps of (col. 2, lines 30-47 of Douglas):

receiving data related to one or more patients (col. 2, lines 30-41 of Douglas);

customizing one or more medical protocols based on the received data to derive one or more customized medical protocols (col. 2, lines 30-47 of Douglas);

transmitting the one or more customized medical protocols and/or information associated therewith to at least one medical monitoring device associated with the one or more patients (Fig. 1 and col. 5, lines 27-53 of Douglas);

the at least one medical monitoring device communicating the customized medical protocol and/or information to the one or more patients, and the one or more patients interacting with said one or more medical monitoring devices to enter patient-reported information (col. 6, lines 7-26 and col. 8, line 66 – col. 9, line 38 of Douglas);

from a second device, transmitting the one or more customized medical protocols and/or information associated therewith to the at least one medical monitoring device, and receiving patient-reported information from the at least one medical monitoring device following the patient interaction with the at least one medical monitoring device (col. 6, line 58 – col. 7, line 44, col. 5, lines 27-53, and col. 8, line 66 – col. 9, line 38 of Douglas);

by the second device, analyzing the patient-reported information according to risk posed to the patient's health, and transmitting prompt transmissions to one or more additional devices based upon the risk posed to the patient's health by the patient-reported information, or storing said information for later review (col. 10, lines 1-27 of Douglas).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited but not applied prior art teaches a method and apparatus for an integrated clinical tele-informatics system (6,139,494).
